Abstract (en)

[origin: WO9851170A1] The protective device (10) is specifically suited for motorcyclists. It is of the type comprising at least one inflatable element arranged substantially along the spinal column of the user and provided with fastening straps intended to cooperate with the user's body. It comprises also automatically triggered inflating means. The device is formed of at least two tubular elements (11, 12) arranged adjacent to the spinal column of the user, in opposite positions, and extending for almost all the length thereof.
