Abstract (en)
[origin: WO9851984A2] The invention concerns a single action semiautomatic firearm provided with a firing system by an inserted cock (11) such as a pistol or optionally a revolver which, by means of a trigger actuated by the release spring, distributes the cartridge either in the slide in the case of a pistol or in the cylinder in the case of a revolver. The invention is characterised in that said firearm has means for blocking (17, 18) the cock when the latter is arranged in a forward position.
