Abstract (en)
[origin: EP0982549A2] The disclosure relates to an arrangement in a radiator bracket comprising a rail (2) with a lower anchorage member which cooperates with a lower portion of the radiator (3). In addition, the rail (2) has an upper anchorage member (5) which is movable downwards under the action of a power unit (6, 7). A connection member (11) is disposed to connect the upper anchorage member (5) with an upper portion (13) of the radiator (1). In the region of the upper anchorage member (5), there is at least one support surface (14, 15). The connection member (11) is movable so as to be positionally aligned thereagainst under the action of the upper anchorage member (5) when the anchorage member (5) is subjected to a downward force and the connection member (11, 18) is connected to the radiator (3). <IMAGE>
