Abstract (en)
[origin: EP1379105A2] A sensor (30) has a single-wind loop that consists of a tube or thick wire and fits over the sensor near heater zones (18,19) and tightly under a glass ceramic plate. In the case of a two-circuit electric radiant element, the sensor loop is shaped in the heater zones with concave peripheral areas (37,38). An Independent claim is also included for a radiant element.
