Abstract (en)
[origin: WO9852531A1] Disclosed are compositions suitable for topical application to human hair or skin, which comprise a combination of a solid polyol fatty acid polyester having a melting point of from about 30 DEG C to about 80 DEG C, and a liquid oil other than a solid polyol fatty acid polyester having a melting point of less than about 30 DEG C to about - 30 DEG C, wherein said solid polyol fatty acid polyester has a polyol moiety and at least 1 fatty acid moiety, the polyol moiety having at least 4 free hydroxyl groups wherein at least 60 % of these free hydroxy groups are esterified with one or more fatty acid moieties having from about 8 to about 22 carbon atoms. The composition preferably further comprises a topical carrier for the liquid polyol fatty acid polyester and solid oil combination. The composition provides effective emolliency and aesthetic benefits.
