Abstract (en)
[origin: WO9950088A1] System for equipping the vehicle (1) passenger compartment with a telematic office, inclusive of the transformation of the internal layout of the compartment into a multiple station for carrying out various kinds of telematic activities capable of activating a multimedia office. The internal layout of the vehicle (1) may easily be replaced in the normal driving conditions as all the systems may be placed in appropriate receptacles in order to turn all the seats back towards the driving position and restore the conditions of comfort for all aboard.
