Abstract (en)

[origin: FR2764042A1] The invention concerns a mechanical connector consisting of a tube (1) provided with a flange (2) separating it into two parts (3, 7). One (3) of the parts, or first part, comprises on its outer wall circular grooves (4) and longitudinal indentations (5) and further comprises a pin (10) with external diameter slightly greater than said tube (1) internal diameter. The invention is useful for connecting a pipe on a block.
