Abstract (en)

[origin: EP0983778A1] The ski boot fastening consists of a clamp mounted on a body (2) that can move lengthwise in a slideway, and a stop (11) to prevent it coming out. The stop is situated at the rear end of the slideway and comprises a detachable component (14) attached to an intermediate member (13) by locking elements. The intermediate member is located beneath the slideway, while the detachable component extends to the rear above it.
