Abstract (en)
[origin: EP0983946A2] In the cover wall (4) are two spaced apart engagement apertures (7,8). A connection between one of the walls (2) and an adhesive tab (6) on an adjacent wall or between overlapping sections of one of these walls is available. Above the container group is a further section of foldable surface material, particularly of cardboard, which involves a reinforcement wall under the cover wall. Two spaced apart engagement apertures in the reinforcement wall between those in the cover wall are provided. A connection is provided with the section (1) encasing the container.
