Abstract (en)
[origin: DE19839409C1] The pivot lever (5) has a long hole (20), in which a polygon (19) of the bearing bolt (7) engages. For a relative movement the longitudinal extent of the polygon is smaller than the length of the long hole and the pivot lever is held on the bearing bolt by means of a fixture device (23) fixing its relative displacement position from the bearing bolt.
