Abstract (en)

[origin: EP0984420A2] Behind the transparent window-type area, the object to be presented is arranged within the box-shaped frame. The support plate (3) is entirely made of transparent material and the window-type area is limited by an opaque surface area (5). This latter area is formed by a colour application on the support plate (3). The opaque area (5) is formed by a surface material connected with the support plate (3). The material forming the opaque area is arranged on the front surface of the transparent support plate and the support plate on its front surface is covered with a protective plate of transparent material.
