Abstract (en)

[origin: EP0984523A1] Described is an electrical connector with a housing (2) having contact cavities (4) with electrical contacts (5) to be secured to the electrical conductors of a cable, the said connector also having a cap (3) which can be mounted from the cable end and which fits tightly around the cable to protect the housing (2) from the ingress of dust and water, the cap (3) being provided with an integrated contact securing device (17) for securing the contacts (5) in the cavities (4) and consisting of two parts (12, 13) which can be joined together perpendicular to the plugging direction. <IMAGE>
