Abstract (en)

[origin: US2001050472A1] The invention concerns a system for fixing a shoe to a sports gear using a fixing device fixed on the sports gear and comprising stop means (60) cooperating with the shoe front end and elastic catching means (50) cooperating with the sole associated catching means (17) arranged behind the sole front end and exerting on said sole a tension pressure towards said stop means. The invention is characterized in that said elastic catching means (50) are anchored on the fixing device, at the rear of the stop means (60). The elastic catching means anchoring means (40, 53) are longitudinally mobile countering the elastic means (38).
