Abstract (en)

[origin: FR2763889A1] The invention concerns an intermediate marker (1) for producing variable markings (8) for preparing a document, comprising a base (2), a coat (3) formed by one or several printed layer(s) of a fixing agent and/or varnish, with a free surface (5) adapted to receive variable markings (8) and comprising a first layer of a fixing agent (3a) applied on at least part of the base (2) surface (4) so as to cover it, the base (2) surface (4) and said fixing agent layer (3a) being adapted to have such adhesive power that the coat (3) can be transferred with the variable markings (8) onto a transparent film (11) to be applied on the document base sheet (13), the variable markings (8) capable of being produced according to their reading direction on the film (3).
