Abstract (en)

[origin: FR2776271A1] The extractor comprises a support (5) anchored to the silo floor for a turret head (6) with variable-position scraper arms (4) and a drive (10). The turret head has at least two and evenly-spaced inclined faces (7), each with a scraper arm mounted on it via a sloping base (8), and the silo floor has two or more vertical gravity outlet ducts (11) in the support's peripheral zone.
