Abstract (en)
[origin: DE19814062A1] The invention relates to a cart (1) that is moved manually and that can be stacked with identical carts (1). Said cart is fitted with support members (4) intended to support a tubular slide handle (7) and a coin deposit lock device (6) having a coupling unit (29) and a locking element (30) for coupling to the coupling unit (29) of another cart (1). The coin deposit lock device (6) is arranged in the connecting area (5) between the slide handle (7) and one of the support elements (4). According to the invention, the coupling unit (29) can be inserted into the slide handle (7) from one of the two free sides (14) of said slide handle (7).
