Abstract (en)

A shelf unit on a movable base with improved actuation, comprising a framework provided with wheels for the movement of the shelf unit (1), the particularity of which is the fact that it comprises actuation means (7-12) which are arranged externally with respect to the useful loading space of the shelf unit (1), are rigidly fixed to the mutually opposite outer walls of the shorter sides of the framework and run from one shorter side to the other of the framework, below a first usable shelf of the shelf unit (1). <IMAGE>
