Abstract (en)

[origin: FR2764584A1] The invention concerns a fixing device for a fluid product dispenser adaptable on a reservoir (1) formed with a neck (10) and comprising a dispensing member (2) mounted on the reservoir (1) neck (10), said neck (10) forming an outer peripheral thickness (11) defining with the rest of the neck a lower shoulder (12), said fixing device comprising a fixing ring (20) to fix the dispensing member on the neck, the fixing ring (20) comprising a peripheral skirt (21) extending up to beneath said shoulder (12). The invention is characterised in that said skirt (21) is provided with flaps (22) the ends of which point inwards and upwards and are urged in stop contact against the shoulder (12) thereby providing a catching mechanism for the fixing ring (20) on the reservoir (1) neck (10).
