Abstract (en)
[origin: DE19722767A1] The invention relates to granular washing or cleaning agents presenting exceptional cleaning powers when they contain between 20 and 55 weight % tensides from the group of anionic tensides, nonioninc tensides and soaps as well as one or several builders from the group of inorganic and organic builders, where the ratio by weight of total tensides used to total quantity of builders used is between 1.2:1 and 1:1.2. Said agents are especially advantageous at wash temperatures below 50 DEG C.
