Abstract (en)

[origin: EP0987175A1] The installation process consists of using dummy supports (7) to support the top sections (12A,12) in which the partitions (15) are to be encastred. Once the partitions have been placed and fixed to the top sections, starting from the bathroom unit (S), the dummy is removed by pivoting its posts (8,9) around rotational spindles (13) which enables the placing of the panels to be continued.
