Abstract (en)

[origin: EP0987195A2] The present invention concerns a toy made up of a combination of packaging (1) with products contained therein, wherein the packaging (1) has at least one surface (2) which is pre-punched such that surface sections (3,4,5,6) which have been defined in advance can be detached, wherein the products contained in the packaging (1) are dimensionally stable, and wherein the detachable surface sections (3,4,5,6) interact with the products such that a new article can be assembled from the surface sections and the products. <IMAGE>
