Abstract (en)

[origin: EP0987391A2] The lock assembly has a spring bolt and a multi-part follower. A divided push pin (12') is inserted into the center section of the follower for a selective operation of the spring bolt retraction either from one or the other pressure sides. The operating side is selected through the insertion depth of the push pin in the follower. The follower has at least three sections (14-17) in succession, where only a center section (17) engages the spring bolt.
