Abstract (en)  
Cathode with micro tips (10) for flat screen display comprising cathode conductors (3) between a substrate (1) and an isolating layer (4) of a grid comprises a layer (20) with a low coefficient of bonding visible at least between the lines of the grid. Preferably this layer (20) is alumina, zinc oxide, chromium oxide, amorphous carbon, or silicon nitride.

Abstract (fr)  
L'invention concerne une cathode à micropointes (10) pour écran plat de visualisation, du type comportant des conducteurs de cathode (3), entre un substrat (1) et une couche d'isolation (4) d'une grille (5), et une couche (20) présentant un faible coefficient de collage, apparente au moins entre des lignes (13) de la grille. <IMAGE>
