Abstract (en)
[origin: WO9857559A1] The invention concerns a device for the protection (2) of the human body having a generally flat shape and comprising means (20) supporting a protective element (4, 5, 6) with a generally flat shape such that the protective device and the protective element are substantially parallel, in contact and opposite each other. The support means (20) are adapted to support the protective element removably.
