Abstract (en)
[origin: WO9952774A1] Method and device for dosing a predefined portion of a material to be packaged, the material being preferably a pasty, semi-liquid or semi-solid material, wherein said material to be dosed is fed within a housing compartment (12), said material is compacted by compressing the material fed in said compartment (12) within a compacting area (12') of said compartment (12), and at least part of the compacted material present in said compacting area (12') is discharged from said compartment (12) thereby realising the predefined dosed portion of material.
