Abstract (en)
: [origin: US6401984B1] The present invention concerns a container of the type made up of a receptacle (2) hermetically containing a product (3) in a liquid, gas or pasty state to be distributed, an end piece (4) for distributing the product (3) and means for protecting the distribution end piece (4).The means for protecting the distributor end piece (4) are made up of a sleeve (8) able to slide freely on said end piece (4) by means of activation means (9A, 9A', 9B, 9B') belonging to it so that said sleeve (8) automatically ensures protection by covering the end piece (4) when the container (1) is placed, or on the other hand freeing it under solely the effect of the inertia of the sub-unit (8-9-11).
