Abstract (en)
[origin: DE19724893A1] The invention relates to a method for producing woven fabric of defined length, consisting of the following steps: 1. placement of the warp ends in a warp end position in a frame determining the defined length and fixation of the warp ends in the frame (warp end station); 2. placement of the frame into a weft device with a shedding device (1st transfer stage); 3. positioning of the weft with actuation of the shedding device (weft station); 4. filling of the frame with the finished woven fabric to the maximum size of the frame (2nd transfer stage); removal of the woven fabric from the frame (removal post).
