Abstract (en)

[origin: EP0988825A2] The sieving surface has at least one zone (11) positioned higher than the usual sieving surface. Filter sieve comprises a sieving section with a sieving surface arranged in a horizontal plane or a plane inclined to the horizontal plane. Solid particles transported by the liquid are retained. The sieving surface has at least one zone (11) positioned higher than the usual sieving surface.
