Abstract (en)
[origin: EP0989069A2] The packaging has two walls which are joined together at their edges, a top and a base. The edges (11,12) of the base fold (8) run parallel to one another and to the central axis (16) of the packaging while the edge seams (5,6) of the side walls (4) converge from the base to the top. Two partition ridges (17) are made from the wall material of the walls and converge from the corners of the top in the direction of the base.
