Abstract (en)
The marker consists of an indicator (1) with a base (2) mounted on a support (5), either fixed or retractable. The indicator has an elongated body with an outer hollow shell (3) of impermeable plastic material, filled with cellular material that is denser towards the base than at the top of the indicator. The base has an under surface designed to be stuck to the support, and an upper surface shaped for fixing to the body shell, which has at least one zone with reduced resistance to flexure.

Abstract (fr)
Balise de voirie comprenant un voyant (1) destiné, en service, à être en saillie au-dessus du niveau de la chaussée (5) et un socle (2) de fixation du voyant à un support (5, 17), le voyant (1) étant formé d'un corps allongé comprenant une enveloppe extérieure (3) en matière plastique étanche et un remplissage interne (4) en matériau alvéolaire. <IMAGE>
