Abstract (en)  
A flexible lamp tube support (10) having a lamp support and a coupling (12) to hold a lamp tube (11) on one end and a latching portion (14) to couple into a through hole is disclosed. The flexible, soft body coupler is inexpensive, has low heat conduction, can securely hold the lamp and cushion the lamp. The simple construction is adaptable to differing lamp, housing, and through hole configurations.
