Abstract (en)

[origin: WO9857854A1] The invention is a package and the method of making the package. A roll to be enclosed has a longitudinal axis. A first layer of material is axially wrapped on the roll with the first layer extending generally parallel to the longitudinal axis. A second and a third layer are then radially wrapped over the first layer in a direction generally perpendicular to the longitudinal axis. The second layer is a protective cushion layer.
