Abstract (en)  
The holder has an advertising surface above and below the waste bin(3). The upper advertising(1) surface is inclined by at least 5 degrees towards the front side in relation to the horizontal, is about 8 centimeters away from the waste bin and has a holder for a transparent material to protect the advertisement carrier against the weather. The lower advertising surface(2) is inclined by at least 5 degrees in the forward direction and also has a weatherproof transparent material holder. Both advertising surfaces and also the waste bin are covered to protect against deposits. The waste bin on the underside is suspended in a bearing to enable it to be tipped forward to simplify emptying.
