Abstract (en)

[origin: EP0990758A2] The driving rod fastening has a profiled-headed bolt (27) operated by a sneck nut (19) and engaging into a locking swivel bracket (7). A slide piece (43) moved by the driving rod is moved into a locking position by the arm (29) of the sneck nut. The profiled headed bolt forms a end-side guide slit (30) into which protrudes a guide protuberance (31) on the housing side. The profiled headed bolt and sneck nut belong to a bearing bracket (17) which also forms a guide ridge (44) for the slide piece.
