Abstract (en)

[origin: EP0990844A1] In the area of the burner tube outlet (14) downstream behind the outlet nozzle (16) is a mixture component (15) movable with the nozzle. A valve member (22) is provided upstream in front of the outlet nozzle in the burner tube (10) and is fitted on the fuel feed tube and with it is axially displaceable. The valve member works in conjunction with a ring-type narrowed area (21) of the burner tube.
