Abstract (en)

[origin: WO9854947A2] Plant growth apparatus including a modular growth element comprising a plant growth bed, a connector for connecting to another such growth element, a heating element disposed in the growth element and thermal insulation that insulates at least one face of the growth element, wherein the heating element raises and maintains a temperature of a substantial portion of the growth element to a level which disinfects the growth bed. The growth element may include a drain trough attached to the growth element and in fluid communication therewith.
