Abstract (en)  
[origin: DE19726971C1] The invention relates to an ink jet printer (10), comprising a printing head (18) which can be displaced parallel to a print line, a print backing support (14, 14', 14'') used to support a printing medium (30), and a covering device (24) and cleaning device (26) for the ink nozzles of the printing head (18). The covering device (24), the cleaning device (26) and a supporting section (28) for the printing medium (30) are arranged on a rotating disk (20) within the printing area of the printing head (18).
