Abstract (en)

[origin: WO9858333A1] The present invention, an embodiment of which is known as Crossmar Matching Service (CMS) (35) provides a method and system for matching order routing of securities and other instruments types, and for matching other transaction information on a post-execution basis, such as during the confirmation and settlement phases. The functions of the present invention occur on the post-execution side of the value chain and include matching the financials, matching the delivery instructions, confirming those deliveries and instructions. The method and system of the present invention thus further provide a confirmation and settlement for these functions.
