Abstract (en)
[origin: DE19727967A1] The device provided to equip the telephone receiver portion of a portable telephone powered by electromagnetic radiation reduces or event totally prevents the outgoing or received electromagnetic radiation from penetrating into the human body. Such a telephone can be so equipped either with the manufacturer or at a later time by the user. Such a device can be used as a shield (1e) for an antenna fitted in a recess on the receiver back (3e).
