Abstract (en)
A pairing device for footwear units, devised for maintaining the two footwear units (1, 2) which constitute a pair of shoes, slippers, boots and the like joined together, to the extent that said units (1, 2) may be associated together by size, foot, colour, ornamentation, material or other circumstances which inseparably relate them at a point of sale, and which is formed by an elongate resilient and/or articulated binding member (3) having at the ends thereof connecting means (5) connectable to respective anchorage point arrangements (4) each provided on one of the footwear units (1, 2).
