Abstract (en)

[origin: US6340183B1] The description relates to a bolt lock for mounting in a thin wall, such as a sheet metal cabinet door, comprising a handle plate which can snap into a rectangular cutout in the thin wall and which has, at one side of the rectangle, a bolt that is supported so as to be displaceable against spring force relative to the thin wall, wherein, the bolt is formed by a second plate which is supported so as to be displaceable against the spring force in the first plate which is held in the thin wall.
