Abstract (en)

[origin: EP0992687A2] The unit has a pump with pump chamber and a back pressure valve (26) located downstream of the pump chamber outlet. The valve has a housing (40) with removeable valve insert (49). The housing has a valve intake (42) and a valve outlet (43), which are formed like connection sockets of a pipe connection. The valve unit is a one-part module, which can be removed from the pump and replaced by a pipe section of corresponding dimensions. The valve intake is formed by a plug socket, fitted into the pump outlet and/or is formed as a threaded socket.
