Abstract (en)

Apparatus for drying substantially ellipsoid products, such as, for instance, eggs (E), which are conveyed over a conveying path (L) by means of a conveyor (1), the apparatus comprising a number of nozzles (2,3) which are connected to a compressor, the nozzles (2,3) being designed and arranged relative to the conveying path (L), such that the drying air blown out by these nozzles (2,3) has a main flow direction (D) which is both directed substantially perpendicularly to the surface (S) of a passing product (E) and blows directly onto at least the areas adjacent the points (P) of a passing product (E). <IMAGE>
