Abstract (en)
[origin: WO9815321A1] The invention relates to an impulse extinguisher, which comprises a barrel (1), that has at least one connection to fill the barrel (1) with the quenching agent, an ejection opening for the quenching agent and a device (4) to eject the quenching agent by pressure. According to the invention said device (4) contains a recess (5) for an explosive material and a firing mechanism to (8) ignite it.
