Abstract (en)

[origin: DE19727774A1] The invention relates to a method for producing a plastic-sheathed component fitted with one or more openings. In order to obtain plastic-sheathed openings in a simple and uncomplicated manner, the invention provides for recesses (9) arranged in the area of the component (7) provided with plastic-sheathed openings (8). Said recesses are filled with plastic material (10) when the component (7) is coated. The openings (8) are made in the plastic material (10) during a subsequent process.
