Abstract (en)

[origin: DE19727073A1] A process is disclosed for producing coated solid particles, as well as coated solid particles. A material with a plastic solidification range and a melting range between 45 DEG C and 75 DEG C is used as coating material. The solid particles to be coated should not be less than 0.05 mm large, in particular not less than 0.1 mm large. Also disclosed is the use of the coated solid particles in cleaning products.
