Abstract (en)
[origin: EP0993794A1] The seat and backrest are supported by a tubular frame and arms (6) serving at least in part as armrests are fixed on the horizontal tubular areas (5) running across above the seat to form an integral backrest. The arms extend over the entire length and/or up into the front areas of the tubes. The transition area (10) between arms and backrest is preferably widened compared to the remaining arm cross section.
