Abstract (en)
The individual segments (103, 203, 303) of a tubular wireway (3) extending itself along the machine and designed to contain electrical cables and/or pipelines for fluids, or similar, are associated with and fixed each to a module (101, 102, 103) of the bed (1) and each provided with at least one branch (133, 233, 333) for the passage of the electrical cables and/or pipelines for fluids, or similar that connect the working unit or units mounted on their respective module (101, 102, 103) of the bed (1), with other parts of the machine or installations, in which the machine is integrated, such as supply and/or control units, or similar. <IMAGE>
