Abstract (en)
[origin: EP0994233A2] The ventilation system has a ventilator bar (50) with air inlet (30) and outlet (31) and a shut-off member (51) with movable displacement member designed as a toothed part which is rigid with the shut-off member and is connected displaceable with a counter toothed part on the operator side. The counter toothed part is a gear rod slider mounted parallel to the plane of the frame and across the shut-off member to engage on the toothed part by an intermediate wheel.
