Abstract (en)  
[origin: WO9903452A1] The present invention relates to pharmaceutical compositions for delivery of drugs intended to reside in the nose, compositions for nasal administration of drugs, e.g., antiviral agents, and particularly antiviral agents comprising the human major rhinovirus receptor, also known as intercellular adhesion molecule-1 (ICAM-1); to methods of making said nasal drug compositions, and to an improved process for the removal of residual solvent from pharmaceutical matrices.
